Course Description

Any coach or athlete who achieves success in the arena of competitive sport does so because of a level of mastery in the mental aspects of athletic performance. Crucial to the success of any team is the role of the coach in the areas of leadership and team unity. Successful sport performance is intrinsically tied to the psychological dimension of achievement. Typically, the level of understanding by the coach or teacher, and subsequent application of sound psychological principles with regard to competitive sport performance falls far below what is needed for optimum athletic achievement. This course offers the athletics coach and/or scholar the opportunity to learn and apply correct psychological principles within the competitive sport context. The assignments contained in this course are closely aligned to National Content Standards in Physical Education for grades Kindergarten through 12th grade.

Note: Required textbooks must be acquired separately.

National Standards Addressed in This Course

National Board for Professional Teaching Standards (NBPTS)

<http://www.nbpts.org/standards-five-core-propositions/>

First published in 1989 and updated in 2016, [*What Teachers Should Know and Be Able to Do*](#) articulates the National Board's Five Core Propositions for teaching. The Five Core Propositions - comparable to medicine's Hippocratic Oath — set forth the profession's vision for accomplished teaching. Together, the propositions form the basis of all National Board Standards and the foundation for National Board Certification. Course assignments have been designed so students can demonstrate excellence against these professional teaching standards whenever possible.

- Proposition 1: Teachers are committed to students and their learning
- Proposition 2: Teachers know the subject they teach and how to teach those subjects to students
- Proposition 3: Teachers are responsible for managing and monitoring student learning
- Proposition 4: Teachers think systematically about their practice and learn from experience
- Proposition 5: Teachers are members of learning communities

National Standards for Sport Coaches (<https://www.shapeamerica.org/standards/coaching>)

Coaches, coaching educators, administrators, athletes and the public use the National Standards for Sport Coaches for direction regarding the knowledge and skills that coaches should possess. The standards feature eight domains of coaching responsibilities and within them, 42 standards and subsequent benchmarks that represent the body of knowledge associated with each coaching responsibility and provide concrete examples of actions and orientations that constitute coaching competence within that particular domain.

Improve the quality of your program and instruction

Use the *National Standards for Sport Coaches* to:

- Provide quality training that will have a positive impact on coaches' performance.
- Establish benchmarks for hiring quality coaches into your program.

- Provide a performance guide for individual professional growth and skill development.
- Learn how a quality coach can optimize your sport experience.

Throughout the course participants will be communicating with the instructor and their classmates on a regular basis using asynchronous discussion forums. A virtual office is utilized for class questions and students are provided with instructor contact information in the event they want to

make email or phone contact. In addition, students are encouraged to email or phone the instructor at any time. Students will also receive feedback on the required assignments as they are submitted.

Forums

Participation is an important expectation of this course and all online courses. Online discussions promote reflection and analysis while allowing students to appreciate and evaluate positions that others express. While students may not be engaging with the same students throughout this course they will be expected to offer comments, questions, and replies to the discussion question whenever possible. The faculty role in the discussion forum is that of an observer and facilitator.

Coursework Hours

Based on the Carnegie Unit standard, a unit of graduate credit measures academic credit based on the number of hours the student is engaged in learning. This includes all time spent on the course: reading the textbook, watching videos, listening to audio lessons, researching topics, writing papers, creating projects, developing lesson plans, posting to discussion boards, etc. Coursework offered for FPU Continuing Education graduate credit adheres to 45 hours per semester unit for the 900-level courses. Therefore, a student will spend approximately 90 hours on a typical 2-unit course or 135 hours on a typical 3-unit course.

Services for Students with Disabilities

Students with disabilities are eligible for reasonable accommodations in their academic work in all classes. In order to receive assistance, the student with a disability must provide the Academic Support Center with documentation, which describes the specific disability. The documentation must be from a qualified professional in the area of the disability (i.e. psychologist, physician or educational diagnostician). Students with disabilities should contact the Academic Support Center to discuss academic and other needs as soon as they are diagnosed with a disability. Once documentation is on file, arrangements for reasonable accommodations can be made.
